

VACCINATION

The background features a teal color with two wavy, horizontal bands of a lighter shade of teal, one near the top and one near the bottom, creating a frame for the central text.

**What exactly is
vaccination ?**

Vaccination is *the injection of a dead or weakened organism that forms immunity against that organism in the body*. Immunization is the process by which an animal or a person stays protected from diseases.

How covid -19 vaccines are helpful?

COVID 19-vaccines are *effective* and can lower your risk of getting and spreading the virus that causes COVID-19. COVID-19 vaccines also **help prevent serious illness and death** in children and adults even if they do get COVID-19.

Why should one get vaccinated?

Vaccines *help the immune system counter infections faster* and in a more effective manner. When you are vaccinated, it sparks the immune response, thus helping the body to *fight off and remember the virus* so that it can attack it in the event of a future invasion.

Do u know ! In India due to covid -19

4.87L deaths !

3.76cr cases!

392cr vaccinated!

A close-up photograph of a person wearing a white lab coat and blue nitrile gloves. They are holding a clear glass vial with a silver cap and a syringe. The syringe is being used to draw a clear blue liquid from the vial. The background is blurred, showing more of the lab coat and a stethoscope. On the right side of the image, there is a teal-colored graphic element with white text.

**What will happen
if we don't get
vaccinated?**

If you will not get vaccinated you only would have to face it's worst consequences. Vaccination is being provided for your own good, for you to be healthy and safe. There are many people who lost their lives due to this pandemic.

CONCLUSION

So let's stand up together
and take this pledge to get
vaccinated let's fight with
this virus together and let's
motivate everyone to get
vaccinated. So I hope after
seeing this presentation u
understood why
vaccination is essential.

#let's get vaccinated

THANKS!
